IUPUI Sustainability Leadership

As stewards of the IUPUI campus and of all its resources, we recognize the interdependence of humans with the environment. We must apply thoughtful and creative planning to achieve a thriving campus community built on the principles of sustainability. We must foster conservation, protection and enhancement of natural resources through campus policy and personal behavior. We must promote a common agenda for IUPUI as a green campus. We must preserve and enhance the quality of life for our campus community and future generations in ways that enhance teaching and learning, research, civic engagement and administrative practices.
